How the Rich are Destroying the Earth Jan 07 2022 A best seller in France, and already translated into Spanish, Italian, Greek, and Korean, Herv Kempf's "How the Rich Are Destroying the Earth" now appears in its first English edition. Bringing to bear more than twenty years of experience as an environmental journalist, Kempf describes the invincibility that many of the world's wealthy feel in the face of global warming, and how their unchecked privilege is thwarting action on the single most vexing problem facing our world. In this important primer on the link between global ecology and the global economy, Kempf makes the following observations: First, that the planet's ecological situation is growing ever worse, despite the efforts of millions of engaged citizens around the world. And second, despite environmentalists' emphasis that "we're all in the same boat," the world's economic elites--who continue to benefit

by plundering the environment--have access to "lifeboats" that insulate them from the resulting catastrophes. Societies have not been able to effectively combat the expanding ecological crisis because it is intimately linked to the social crisis in which the ruling form of capitalism has been organized to impede democratic initiatives. This link explains the failure to make progress against the greatest emergency of our time, because in this relationship the oligarchy plays an essential and destructive role. For this reason, solving the ecological crisis depends on disrupting the power of the world's elite. We cannot understand the entwined ecological and social crises, Kempf argues, if we don't see them as the two sides of the same disaster--a disaster that comes from a system piloted by a dominant social strata that has no drive other than greed, no ideal other than conservatism, no dream other than technology. But Kempf also calls for measured optimism: "Despite the scale of the challenges that await us, solutions are emerging and--faced with the sinister prospects the oligarchs promote--the desire to remake the world is being reborn."

You Got Into Where? Sep 15 2022 ""You Got Into Where?"" is the first college admissions guide written by a student who is fresh out of the college admissions process. Learn how I was admitted to schools like the University of Southern California and New York University with full tuition scholarships. The guide features copies of my admissions essay, writing supplement, and activities resume that I used to apply to college the fall of my senior year. Get advice on all the secrets of the admissions process from start to finish. ""I can't believe that a 17 year-old has written a college admissions books that is so well-written, clear and accurate. No wonder USC jumped at the chance to have her become their student. My sense of things is that mostly parents read college admissions books; high school students just don't want to take the time. Given what she says and how she says it, I truly believe that teens will rush to read "You Got Into Where?" It is well worth their time."" -Marjorie Hansen Shaevitz Author, adMISSION POSSIBLE

Perspectives on Assessment and Evaluation in International Schools Oct 24 2020 Assessment and evaluation are two concepts at the core of schooling which are also central to other forms of education worldwide. In an international context, assessment and evaluation data are increasingly widely used for accountability and quality assurance purposes at individual student, institutional, national and global levels. This book does not attempt to include consideration of all the issues that could possibly be covered in a title that addresses assessment and evaluation in education internationally. Nor has it set out to cover the myriad technical issues with which assessment and evaluation are inevitably concerned. Rather, a number of authors working within different contexts of international education (whether as teachers or leaders in international schools, administrators in international examination bodies, or researchers in international educational research organisations) have been invited to share ideas arising from their own experiences of what might be interpreted as assessment or evaluation, be that assessment of student achievement, evaluation of teacher effectiveness or evaluation of school quality. The international dimension presents a range of challenges to those with responsibility for implementing assessment and evaluation strategies in widely diverse linguistic, cultural, social and personal contexts, and in this book valuable contributions are shared by colleagues who are authorities in the field. It is their personal views on assessment and evaluation, derived from professional practice in the international sphere, that have been brought together here.

Ditch That Textbook Mar 17 2020 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Trivium 21c Feb 25 2021 Education policy and practice is a battleground between sworn enemies. Traditionalists argue for the importance of a privileged type of 'hard' knowledge and deride 'soft' skills. Progressives deride learning about great works of the past; preferring '21stC skills' like critical thinking, and teamwork. Whilst looking for a school for his daughter, the author became frustrated by schools' inability to value knowledge, as well as creativity, foster discipline alongside free-thinking, and value citizenship alongside independent learning. Drawing from his work as a creative teacher Robinson finds inspiration in the Arts and the need to nurture learners with the ability to deal with the uncertainties of our age. From Ancient Greece to the present day, this book explores whether a contemporary trivium (Grammar, Dialectic, and Rhetoric) can unite progressive and traditionalist institutions, teachers, politicians and parents in the common pursuit of providing a great education for our children in 21st Century.

Global Warming - Myth or Reality? Aug 14 2022 This book seeks to separate fact from fiction in the global-warming debate. The author begins by describing the history of the Intergovernmental Panel on Climate Change (IPCC) and many other conferences, and their dire predictions on global temperatures, rainfall, weather and climate, while highlighting confusion and sensationalism media reports. He then lays out the "heretical" scientific case of the sizable skeptical scientific community who challenge the accepted wisdom.

He shows how understanding the stars is the key to understanding the galaxies they inhabit, and how they provide us with clues to the existence of planets like our own.

Educational Reform and International Baccalaureate in the Asia-Pacific Nov 24 2020 The need to reform secondary-level education to prepare young people for new economic realities has emerged. In an age of constant career changing, cognitive flexibility is a top-priority skill to develop in today's students. This shift requires methodological innovation that enhances children's natural abilities as well as updated, focused teacher education in order to prepare them adequately. Educational Reform and International Baccalaureate in the Asia-Pacific is a collection of innovative research that examines the development and implementation of IB curricula. Highlighting a wide range of topics including critical thinking, student evaluation, and teacher training, this book is ideally designed for educators, curriculum developers, instructional designers, administrative officials, policymakers, researchers, academicians, and students.

Curriculum 21 Jun 19 2020 "What year are you preparing your students for? 1973? 1995? Can you honestly say that your school's curriculum and the program you use are preparing your students for 2015 or 2020? Are you even preparing them for today?" With those provocative questions, author and educator Heidi Hayes Jacobs launches a powerful case for overhauling, updating, and injecting life into the K-12 curriculum. Sharing her expertise as a world-renowned curriculum designer and calling upon the collective wisdom of 10 education thought leaders, Jacobs provides insight and inspiration in the following key areas: * Content and assessment--How to identify what to keep, what to cut, and what to create, and where portfolios and other new kinds of assessment fit into the picture. * Program structures--How to improve our use of time and space and groupings of students and staff. * Technology--How it's transforming teaching, and how to take advantage of students' natural facility with technology. * Media literacy--The essential issues to address, and the best resources for helping students become informed users of multiple forms of media. * Globalization--What steps to take to help students gain a global perspective. * Sustainability--How to instill enduring values and beliefs that will lead to healthier local, national, and global communities. * Habits of mind--The thinking habits that students, teachers, and administrators need to develop and practice to succeed in school, work, and life. The answers to these questions and many more make Curriculum 21 the ideal guide for transforming our schools into what they must become: learning organizations that match the times in which we live.

Learning Rainforest Nov 12 2019 The Learning Rainforest is an attempt to capture various different elements of our understanding and experience of teaching. It is a celebration of great teaching - the joy of it and the intellectual and personal rewards that teaching brings. It is aimed at teachers of all kinds; busy people working in complex environments with little time to spare. The core of the book is a guide to making teaching both effective and manageable; it provides an accessible summary of key contemporary evidence-based ideas about teaching and learning and the debates that all teachers should be engaging in. It's a book packed with strategies for making great teaching attainable in the context of real schools. The Learning Rainforest metaphor is an attempt to capture various different elements of our understanding and experience of teaching. Tom's ideas about what constitutes great teaching are drawn from his experiences as a teacher and a school leader over the last 30 years, alongside everything he has read and all the debates he's engaged with during that time. An underlying theme of this book is that a career in teaching is a process of continual personal development and professional learning as is engaging in fundamental debates rage on about the kind of education we value. As you meet each new class and move from school to school, your perspectives shift; your sense of what seems to work adjusts to each new context. In writing this book, Tom is trying to capture some of the journey he's been on. He has learned that it is ok to change your mind. More than that - sometimes it is simply necessary to get your head out of the sand, to change direction; to admit your mistakes.

Launch Sep 22 2020 Something happens in students when they define themselves as makers and inventors and creators. They discover powerful skills-problem-solving, critical thinking, and imagination-that will help them shape the world's future ... our future. If that's true, why isn't creativity a priority in more schools today? Educators John Spencer and A.J. Juliani know firsthand the challenges teachers face every day: School can be busy. Materials can be scarce. The creative process can seem confusing. Curriculum requirements can feel limiting. Those challenges too often bully creativity, pushing it to the side as an "enrichment activity" that gets put off or squeezed into the tiniest time block. We can do better. We must do better if we're going to prepare students for their future. LAUNCH: Using Design Thinking to Boost Creativity and Bring Out the Maker in Every Student provides a process that can be incorporated into every class at every grade level ... even if you don't consider yourself a "creative teacher." And if you dare to innovate and view creativity as an essential skill, you will empower your students to change the world-starting right now. Look, Listen,

and Learn Ask Lots of Questions Understand the Problem or Process Navigate Ideas Create Highlight What's Working and Failing Are you ready to LAUNCH?

Introduction to the Personal Software Process(sm) Apr 17 2020 This newest book from Watts Humphrey is a hands-on introduction to basic disciplines of software engineering. Designed as a workbook companion to any introductory programming or software-engineering text, Humphrey provides here the practical means to integrate his highly regarded Personal Software Process (PSP) into college and university curricula. The book may also be adapted for use in industrial training or for self-improvement by practicing software engineers. Applying the book's exercises to their course assignments, students learn both to manage their time effectively and to monitor the quality of their work, good practices they will need to be successful in their future careers. The book is supported by its own electronic supplement, which includes spreadsheets for data entry and analysis. A complete instructor's package is also available. By mastering PSP techniques early in their studies, students can avoid--or overcome--the popular "hacker" ethic that leads to so many bad habits. Employers will appreciate new hires prepared to do competent professional work without, as now is common, expensive retraining and years of experience.
