*The Great Law and the Longhouse* Mar 09 2022 An in-depth survey of Iroquois culture and history This masterful summary represents a major synthesis of the history and culture of the Six Nations from the mid-sixteenth century to the Canandaigua treaty of 1794. William N. Fenton, renowned as the dean of Iroquoian studies, draws on primary sources, in both French and English to create a readable narrative and an invaluable reference for all future scholars of Iroquois polity. Central to Fenton's study is the tradition of the Great Law, still practiced today by the conservative Iroquois. It is sustained by celebrations of the condolence ceremony when participants mourn a dead chief and install his successor for life on good behavior. This ritual act, reaching back to the dawn of history, maintained the League of the Iroquois, the legendary form of government that gave way over time to the Iroquois Confederacy.

*Great Book of Shop Drawings for Craftsman Furniture, Revised & Expanded Second Edition* Nov 24 2020 Great Book of Shop Drawings for Craftsman Furniture, Revised & Expanded Second Edition is a complete sourcebook of working shop drawings for 61 classic pieces of American furniture. Whether known as Craftsman, Arts & Crafts, or Mission, these sturdy, straightforward and immensely popular designs have graced American homes for more than 100 years. The author, a master cabinetmaker, measured original Craftsman antiques to create these detailed plans. This revised new paperback edition is compiled from three of his previous books: Shop Drawings for Craftsman Furniture; Shop Drawings for Craftsman Inlays & Hardware; and More Shop Drawings for Craftsman Furniture. Every type of furniture is represented here: from trestle tables, love seats, and nightstands to corner cabinets, rockers, tabourets and more. With perspective views, elevations, sections, details, and cutting lists, this book gives woodworkers the heart of the Craftsman aesthetic, along with all the information needed for workshop success. A bonus section on inlays and hardware offers original designs that add color, lyricism, and a graceful flourish to ever-popular Craftsman furniture.

**Darius the Great Is Not Okay** Feb 08 2022 Darius doesn't think he'll ever be enough, in America or in Iran. Hilarious and heartbreaking, this unforgettable debut introduces a brilliant new voice in contemporary YA. Winner of the William C. Morris Debut Award "Heartfelt, tender, and so utterly real. I'd live in this book forever if I could." —Becky Albertalli, award-winning author of *Simon vs. the Homo Sapiens Agenda* Darius Kellner speaks better Klingon than Farsi, and he knows more about Hobbit social cues than Persian ones. He's a Fractional Persian—half, his mom's side—and his first-ever trip to Iran is about to change his life. Darius has never really fit in at home, and he's sure things are going to be the same in Iran. His clinical depression doesn't exactly help matters, and trying to explain his medication to his grandparents only makes things harder. Then Darius meets Sohrab, the boy next door, and everything changes. Soon, they're spending their days together, playing soccer, eating faludeh, and talking for hours on a secret rooftop overlooking the city's skyline. Sohrab calls him Darioush—the original Persian version of his name—and Darius has never felt more like himself than he does now that he's Darioush to Sohrab. Adib Khorram's brilliant debut is for anyone who's ever felt not good enough—then met a friend who makes them feel so much better than okay.

*Great Norse, Celtic and Teutonic Legends* Aug 14 2022 Captivating collection of legends and romances from the Teutonic Middle Ages—Hegeling and Nibelung, Beowulf, Knights of the Round Table, Lohengrin, more. Inspiring reading, both in and out of the classroom.

**The Great Demographic Reversal** Nov 12 2019 This original and panoramic book proposes that the underlying forces of demography and globalisation will shortly reverse three multi-decade global trends – it will raise inflation and interest rates, but lead to a pullback in inequality. "Whatever the future holds", the authors argue, "it will be nothing like the past". Deflationary headwinds over the last three decades have been primarily due to an enormous surge in the world's available labour supply, owing to very favourable demographic trends and the entry of China and Eastern Europe into the world's trading system. This book demonstrates how these demographic trends are on the point of reversing sharply, coinciding with a retreat from globalisation. The result? Ageing can be expected to raise inflation and interest rates, bringing a slew of problems for an over-indebted world economy, but is also anticipated to increase the share of labour, so that inequality falls. Covering many social and political factors, as well as those that are more purely macroeconomic, the authors address topics including ageing, dementia, inequality, populism, retirement and debt finance, among others. This book will be of interest and understandable to anyone with an interest on where the world's economy may be going.

**Great Calculations** Jul 01 2021 Science is based not only on observation and experiment, but on theory as well. As Einstein said, "Theory tells us what to measure." And theories are often crystallized into succinct calculations, like those made using Einstein's famous  $E = mc^2$ . This book looks at fifty such great calculations, exploring how and why they were developed and assessing their impact on the history of science. As the author shows, many significant scientific calculations are quite simple and fairly easy to understand, even for readers with little math background. But their implications can be surprising and profound. For example, what links a famous comet and the cost of an annuity? Why do scientists claim there is "dark matter" in the universe if it can't be observed? How does carbon-based life on Earth depend on a quirk of nuclear physics? The answer to each question is an illuminating calculation. This accessible, engaging book will help you understand these breakthroughs and how they changed our view of life and the world.

**The Great Bridge** Jun 19 2020 The dramatic and enthralling story of the building of the Brooklyn Bridge, the world's longest suspension bridge at the time, a tale of greed, corruption, and obstruction but also of optimism, heroism, and determination, told by master historian David McCullough. This monumental book is the enthralling story of one of the greatest events in our nation's history, during the Age of Optimism—a period when Americans were convinced in their hearts that all things were possible. In the years around 1870, when the project was first undertaken, the concept of building an unprecedented bridge to span the East River between the great cities of Manhattan and Brooklyn required a vision and determination comparable to that which went into the building of the great cathedrals. Throughout the fourteen years of its construction, the

odds against the successful completion of the bridge seemed staggering. Bodies were crushed and broken, lives lost, political empires fell, and surges of public emotion constantly threatened the project. But this is not merely the saga of an engineering miracle; it is a sweeping narrative of the social climate of the time and of the heroes and rascals who had a hand in either constructing or exploiting the surpassing enterprise.

***Across the Great Divide*** Dec 18 2022 (Book). This is a vivid and rollicking account of The Band's journey across three decades. ***Evening in the Palace of Reason*** Mar 17 2020 Tells the story of the history-making meeting between scorned master composer Johann Sebastian Bach and Prussia's Frederick the Great.

***The Mayans Among Us*** Jan 27 2021 When Ann L. Sittig made a quick stop at a secondhand shop in a small meatpacking town in Nebraska, she overheard a couple speaking Spanish with the unmistakable inflection of Mayan. When she inquired further, the couple confirmed that they were Mayans from Guatemala and indicated there were lots of Mayans living in the area. Soon afterward, Sittig met Martha Florinda Gonz•lez, a Mayan community leader living in Nebraska, and together they began gathering the oral histories of contemporary Mayan women living in the state and working in meatpacking plants. In *The Mayans Among Us*, Sittig and Gonz•lez focus on the unique experiences of the Central American indigenous immigrants who are often overlooked in media coverage of Latino and Latina migration to the Great Plains. Many of the Mayan immigrants are political refugees from repressive, war-torn countries and as such are distinct from Latin America's economic immigrants. Sittig and Gonz•lez initiated group dialogues with Mayan women about the psychological, sociological, and economic wounds left by war, poverty, immigration, and residence in a new country. The Mayans share their concerns and hopes as they negotiate their new home, culture, language, and life in Nebraska in order to survive and send economic support back home for their children. Longtime Nebraskans share their perspectives on the immigrants as well. *The Mayans Among Us* poignantly explores how Mayan women in rural Nebraska meatpacking plants weave together their three distinct identities: Mayan, Central American, and American.

***Democracy's Prisoner*** Aug 02 2021 In 1920, socialist leader Eugene V. Debs ran for president while serving a ten-year jail term for speaking against America's role in World War I. Though many called Debs a traitor, others praised him as a prisoner of conscience, a martyr to the cause of free speech. Nearly a million Americans agreed, voting for a man whom the government had branded an enemy to his country. In a beautifully crafted narrative, Ernest Freeberg shows that the campaign to send Debs from an Atlanta jailhouse to the White House was part of a wider national debate over the right to free speech in wartime. Debs was one of thousands of Americans arrested for speaking his mind during the war, while government censors were silencing dozens of newspapers and magazines. When peace was restored, however, a nationwide protest was unleashed against the government's repression, demanding amnesty for Debs and his fellow political prisoners. Led by a coalition of the country's most important intellectuals, writers, and labor leaders, this protest not only liberated Debs, but also launched the American Civil Liberties Union and changed the course of free speech in wartime. The Debs case illuminates our own struggle to define the boundaries of permissible dissent as we continue to balance the right of free speech with the demands of national security. In this memorable story of democracy on trial, Freeberg excavates an extraordinary episode in the history of one of America's most prized ideals.

***Good to Great*** Feb 20 2023 *The Challenge Built to Last*, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

***Rescuing Socrates*** May 11 2022 A Dominican-born academic tells the story of how the Great Books transformed his life—and why they have the power to speak to people of all backgrounds What is the value of a liberal education? Traditionally characterized by a rigorous engagement with the classics of Western thought and literature, this approach to education is all but extinct in American universities, replaced by flexible distribution requirements and ever-narrower academic specialization. Many academics attack the very idea of a Western canon as chauvinistic, while the general public increasingly doubts the value of the humanities. In *Rescuing Socrates*, Dominican-born American academic Roosevelt Montás tells the story of how a liberal education transformed his life, and offers an intimate account of the relevance of the Great Books today, especially to members of historically marginalized communities. Montás emigrated from the Dominican Republic to Queens, New York, when he was twelve and encountered the Western classics as an undergraduate in Columbia University's renowned Core Curriculum, one of America's last remaining Great Books programs. The experience changed his life and determined his career—he went on to earn a PhD in English and comparative literature, serve as director of Columbia's Center for the Core Curriculum, and start a Great Books program for low-income high school students who aspire to be the first in their families to attend college. Weaving together memoir and literary

reflection, *Rescuing Socrates* describes how four authors—Plato, Augustine, Freud, and Gandhi—had a profound impact on Montás's life. In doing so, the book drives home what it's like to experience a liberal education—and why it can still remake lives.

**Start with Why** Oct 16 2022 The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. *START WITH WHY* asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. *START WITH WHY* shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

*The Great Book of Chocolate* Apr 10 2022 A compact connoisseur's guide, with recipes, to today's cutting-edge array of chocolates and chocolate makers from former Chez Panisse pastry chef David Lebovitz. In this compact volume, David Lebovitz gives a succinct cacao botany lesson, explains the process of chocolate making, runs through chocolate terminology and types, presents information on health benefits, offers an evaluating and buying primer, profiles the world's top chocolate makers and chocolatiers (with a whole chapter dedicated to Paris alone!), and shares dozens of little-known factoids in sidebars throughout the book. The Great Book of Chocolate includes more than 50 location and food photographs, and features more than 30 of Lebovitz's favorite chocolate recipes, from Black-Bottom Cupcakes to Homemade Rocky Road Candy, Orange and Rum Chocolate Mousse Cake to Double Chocolate Chip Espresso Cookies. His extensive resource section (with websites for international ordering) can bring the world's best chocolate to every door. **Great by Choice** Jun 12 2022 Ten years after the worldwide bestseller *Good to Great*, Jim Collins returns with another groundbreaking work, this time to ask: why do some companies thrive in uncertainty, even chaos, and others do not? Based on nine years of research, buttressed by rigorous analysis and infused with engaging stories, Collins and his colleague Morten Hansen enumerate the principles for building a truly great enterprise in unpredictable, tumultuous and fast-moving times. This book is classic Collins: contrarian, data-driven and uplifting.
