[Castles of Wales](#) Aug 22 2020 In 1277, Llywelyn ap Gruffudd, Prince of Gwynedd, met with Edward I of England in Aberconwy to finalise a treaty that would change the fate of both nations. His hand forced by Edward's invasion earlier that year, Llywelyn's acceptance of the terms confirmed not only short-term peace but also that the rule of Wales would pass to Edward on his death. To augment his rising dominance, the English king embarked on a building project that saw the rise of some of the most recognisable fortresses in Europe. Quite literally, an "Iron Ring" of castles. Even before the construction of Edward's infamous "Iron Ring", castles were by no means rare in Wales. Both before and simultaneous to William the Conqueror's establishment of timber and stone fortresses in the south and borderlands, a process continued by many of his descendants, native structures also existed. Though often more palatial than protective, such constructions proved decisive to the ongoing wars and were often chosen as sites for future castles. Just as had been the case in England, the story of the castle crosses many centuries. Many began as Roman forts, whereas others date from more modern times. While many are now romantic ruins, others remain cherished family homes, if not hotels or museums. By adopting an identical approach to that seen in Castles of England, the purpose of this book is to throw light on the stories behind them. For as long as there have been castles in Wales, there have been mysteries within their walls. Murders that remain unsolved, treasures unfound, prisoners left to rot in the darkest pits and valiant warriors whose heroic deeds have become a cherished part of the Welsh identity. From blood-soaked heroes to long-lost legends, despotic pirates to wailing hags, Castles of Wales offers a fresh investigation into many of its fascinating fortresses. No country has more castles per square mile than Wales. Even today, there are more than 200 to be enjoyed. Inspired by such a rich tapestry of tales, this book provides an essential introduction to the nation many regard as "The Land of Castles".

Churches, Castles and Landscape in the Frankish East Jul 01 2021 The studies in this book are the product of the years that Denys Pringle has spent investigating the material evidence for Latin settlement in Syria and Palestine in the twelfth and thirteenth centuries. Focusing on the building remains of churches and castles - and their relationship to the landscape - the volume explores the architecture of the Cistercian houses in Jerusalem, the geographical distribution of church buildings, and the influence that factors such as existing local architectural traditions and the need to accommodate visiting pilgrims may have had on the design of Latin churches and religious houses.

The Irish tower house Oct 12 2019 This book examines the social role of castles in late-medieval and early modern Ireland. It uses a multidisciplinary methodology to uncover the lived experience of this historic culture, demonstrating the interconnectedness of society, economics and the environment. Of particular interest is the revelation of how concerned pre-modern people were with participation in the economy and the exploitation of the natural environment for economic gain. Material culture can shed light on how individuals shaped spaces around themselves, and tower houses, thanks to their pervasiveness in medieval and modern landscapes, represent a unique resource. Castles are the definitive building of the European Middle Ages, meaning that this book will be of great interest to scholars of both history and archaeology.

Farm Houses, Manor Houses, Minor Chateaux and Small Churches From the Eleventh to the Sixteenth Centuries in Normandy, Brittany and Other Parts of France (Classic Reprint) Mar 09 2022

Excerpt from Farm Houses, Manor Houses, Minor Chateaux and Small Churches From the Eleventh to the Sixteenth Centuries in Normandy, Brittany and Other Parts of France From the first beginnings of the Middle Ages in the last quarter of the X century; the grand style in architecture develops side by side with the minor style, as, under the new social conditions, must have been the case. Great abbeys, cathedrals, castles, reveal themselves, growing ever more complex and gigantic, but art is no longer the possession of a favoured few, it is now the heritage of all, and for one great monument there are scores of little churches, minor priories, small castles, with somewhat later, town houses, chapels, farms, manors and Chateaux in ever-increasing numbers and infallible charm. To build up a philosophy of Medieval art and a science of Gothic architecture on the foundations of only such strue tures as the abbeys of Caen, the cathedrals of Chartres, Notre Dame, Rheims, Amiens, Beauvais, to the total ignoring of the work and the people as a whole, is absurd, for the art of Medievalism was essen tially a communal art and to a degree never approached before. It was not the product of a few highly trained specialists expressing their own idiosyncracies, but the spontaneous and instinctive art of a whole people, or rather of groups of people acting under a common impulse, in accordance with varying conditions, to a common end. Little Wars Apr 29 2021 "[...]walls, into which our toy bricks could be packed, and on which we could paint doors and windows, creepers and rain-water pipes, and so forth, to represent houses, castles, and churches in a more realistic manner, and, growing skilful, we made various bridges and so forth of card. Every boy who has ever put together model villages knows how to do these things, and the attentive reader will find them edifyingly represented in our photographic illustrations. There has been little development since that time in the Country. Our illustrations show the methods of arrangement, and the reader will see how easily and readily the utmost variety of battlefields can be made. (It is merely to be remarked that a too crowded Country makes the guns ineffective and leads to a mere tree to tree and house to house scramble, and that large open spaces along the middle, or rivers without frequent fords and bridges, lead to ineffective cannonades, because of the danger of any advance. On the whole, too much cover is better than too little.) We decided that one player should plan and lay out the Country, and the other player choose from which side he would come. And to-day we play over such landscapes in a cork-carpeted schoolroom, from which the proper occupants are no longer evicted but remain to take an increasingly responsible and less and less audible and distressing share in the operations.[...]"
